LEARNING REPORT

Gayatri Phadnis

Class 10

29 Oct 2026 – 29 Oct 2026

BEFORE YOU BEGIN

How to read this booklet

This booklet is built from everything Gayatri did in the Mathology Class 10 labs: lessons opened, labs explored, answers given, help used and reasoning written.

- **On your own** answers had no hint, worked explanation or repeated question. They are the fairest picture of what you can do.
- **Supported answers** came after help or practice mode. They show learning in progress, not a weakness.
- **Too early to tell** means there isn't enough evidence yet. An unattempted skill is not a weak skill.
- Marking a lesson complete is your own report of finishing it, not a test result.
- **Active time** counts only while the chapter was on screen and in use; breaks are left out.

Answers are checked in the browser by each chapter's rules. Times are shown in Asia/Kolkata time.

empty or not readable

Asking for help is part of learning. Supported answers are kept apart from your own.

CHAPTER 1 · PART 1 OF 2

1 Real Numbers

100% correct	**100%** on your own	**13 min** active
13/36 skills tried	**5/5** challenges done	**2** lessons marked done

Distinguish a prime number from a composite number

○ Too early to tell

1/1 correct · 1/1 on your own

Select a prime divisor of a composite number

○ Too early to tell

1/1 correct · 1/1 on your own

Continue dividing until every factor is prime

○ Too early to tell

1/1 correct · 1/1 on your own

Express repeated prime factors using exponents

○ Too early to tell

1/1 correct · 1/1 on your own

Verify a factorisation by multiplying its factors

○ Too early to tell

1/1 correct · 1/1 on your own

Align the prime factorizations of two or three numbers

○ Too early to tell

1/1 correct · 1/1 on your own

Choose the minimum exponent of each shared prime for HCF

○ Too early to tell

1/1 correct · 1/1 on your own

CHAPTER 1 · PART 2 OF 2

1 Real Numbers

Choose the maximum exponent of every occurring prime for LCM

1/1 correct · 1/1 on your own

○ Too early to tell

Multiply the selected prime powers to obtain HCF or LCM

1/1 correct · 1/1 on your own

○ Too early to tell

Find an unknown LCM from the HCF and the two integers

2/2 correct · 2/2 on your own

○ Too early to tell

Use divisibility rules for 2, 3 and 5

2/2 correct · 2/2 on your own

○ Too early to tell

Distinguish factors from multiples

2/2 correct · 2/2 on your own

○ Too early to tell

Simplify a rational fraction to lowest terms

2/2 correct · 2/2 on your own

○ Too early to tell
